

In the Claims

1. A tool holder for a floor cleaning apparatus including a wand and a cleaning tool, said tool holder comprising:  
a body;  
a first means on said body for holding said wand; and  
5 a second means on said body for holding said cleaning tool.

2. A tool holder for a floor cleaning apparatus including a wand and a cleaning tool, said tool holder comprising:  
a body, said body including;  
a wand receiver and a cleaning tool receiver.

3. The tool holder of claim 2, further including a lug for mounting said body to the floor cleaning apparatus.

4. The tool holder of claim 2, further including a clip adjacent said wand receiver.

5. The tool holder of claim 4, further including a conduit joiner having a mounting section received in said clip.

6. The tool holder of claim 2, wherein said wand receiver includes a socket.

7. The tool holder of claim 6, wherein said wand receiver also includes a stabilizer.

8. The tool holder of claim 6, wherein said socket includes an end wall.

9. The tool holder of claim 8, wherein said cleaning tool receiver is provided in said end wall.

10. The tool holder of claim 9, wherein said cleaning tool receiver is an elongated slot in said end wall.

11. A tool holder for a floor cleaning apparatus including a wand and a cleaning tool, said tool holder comprising a body including a first receiver for holding the wand and a second receiver in said first receiver for holding the cleaning tool when the wand is removed from said first receiver.

12. The tool holder of claim 11, further including a lug for mounting said body to the floor cleaning apparatus.
13. The tool holder of claim 11, further including a clip adjacent said first receiver.
14. The tool holder of claim 13, further including a conduit joiner having a mounting section received in said clip.
15. The tool holder of claim 11, wherein said first receiver includes a socket.
16. The tool holder of claim 15, wherein said first receiver also includes a stabilizer.
17. The tool holder of claim 15, wherein said socket includes an end wall.
18. The tool holder of claim 17, wherein said second receiver is provided in said end wall.
19. The tool holder of claim 18, wherein said second receiver is an elongated slot in said end wall.

20. A method for holding a wand and a cleaning tool in a holder on a floor cleaning apparatus, comprising:

holding the wand in said holder and the cleaning tool in the wand when the wand and cleaning tool are not in use; and

5 holding the cleaning tool in said holder when the wand is in use without the cleaning tool.

21. A vacuum cleaner including the tool holder of claim 1.

22. A vacuum cleaner including the tool holder of claim 2.

23. A vacuum cleaner including the tool holder of claim 11.
